DETAILED ACTION

Status of Claims

Claims 1 and 4-13 are in the application.

Drawings

The proposed drawing corrections are approved. Formal drawings are required without addition of new matter.

Reconsideration Of The Finality Of The Rejection

Applicant's request for reconsideration of the finality of the rejection of the last Office action in view of the applicant's amendments to the application is persuasive and, therefore, the finality of that action is withdrawn. The prosecution of the application is reopened.

Ex Parte Quayle

This application is in condition for allowance except for the following formal matters:

Claims 1, 4, 5 and 9 are objected to because of the following informalities:

In claims 1, 4, 5 and 9 the preamble recites a method for fabricating a capacitor.

However, the method steps in body of the claims do not set forth clearly as to how the capacitor is formed.

In claims 1, 4, 5 and 9, it is not clear whether deposition of TEOS, SiN and BPTEOS on the substrate is in combination or sequential or otherwise.

Art Unit: 2825

Appropriate correction is required pointing out the support in the specification for the correction in support of that no new matter has been added.

Claim 13 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 9. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). The Examiner suggests cancellation of claim 13 as it is duplicate of claim 9.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Claims 1 and 4-13 would be allowable ^{*after the objections are overcome*} over the prior art of record. The prior art of record does not teach or suggest inter alia the planarization of the first inner poly oxide layer (IPO-1 layer).
